

Hosting: Multi-tenant Cloud

Tenancies operate within ORockCloud's FedRAMP Moderate and High boundaries. They provide secure shared access to computing resources that can be scaled up or down as needed to meet your flexible business and technical requirements. Solution requires customer choose a Compute instance, storage capacity option, network connectivity and software as needed.

Hourly Consumption Usage Based Pricing

Access compute, storage and network resources, on-demand in a scalable, secure, multi-tenant hosting environment. Pay only for the computing consumption you use on an hourly or monthly basis.
