ORock Secure Containers as a Service with Red Hat OpenShift

ORock Secure Containers as a Service with Red Hat OpenShift is a solution that provides a fully managed Platform as a Service (PaaS). It is integrated within ORock's FedRAMP authorized environment. This managed service offer includes White Glove setup and support, expertly managed infrastructure including master and infrastructure nodes. Items to add to a complete solution will be worker nodes, storage based on customer needs, and Red Hat OpenShift licenses. *Call for a formal quote.

<i>Item</i>	<i>Description</i>	<i>Price/Month</i>
ORSCMINDEVCP-MO	ORock Secure Containers: Minimal Development (non-production) Control Plane provides Cloud infrastructure needed for a non-production environment to support Red Hat OpenShift. This solution includes setup and support to maintain the environment, but does NOT include high availability (HA), or user facing logging and metric services.	\$1,440
ORSCDEVCP-MO	ORock Secure Containers: Development (non-production) Control Plane provides Cloud infrastructure needed for a non-production environment to support Red Hat OpenShift. This solution includes setup and support to maintain the environment, includes user facing logging and metric services, but does NOT include high availability (HA).	\$1,890
ORSCMINPRODCP-MO	ORock Secure Containers: Minimal Production Control Plane provides Cloud infrastructure needed for high availability (HA) in a production capable environment to support Red Hat OpenShift. This solution includes setup and support to maintain the environment, but does NOT include user facing logging or metric services.	\$3,160
