SPLUNK ENTERPRISE
ON THE OROCK CLOUD

PRODUCT BRIEF

OROCK

ORockCloud

splunk>

ORock provides managed Splunk Enterprise to rapidly and easily scale to meet growing Splunk storage and compute needs.

Splunk Enterprise on ORock Cloud offers exceptional **storage performance**, verifiable security, and $0 egress fees and API calls.

ORock's **Federal and Commercial** customers can now leverage managed Splunk Enterprise in their ORock FedRAMP cloud environments - bringing secure log aggregation and analytics to new or existing cloud workloads.

" Splunk Enterprise on ORock's secure cloud just makes sense. Customers come to us to meet their compliance needs and our partnership with Splunk allows us to meet those needs with best-in-market solutions. "
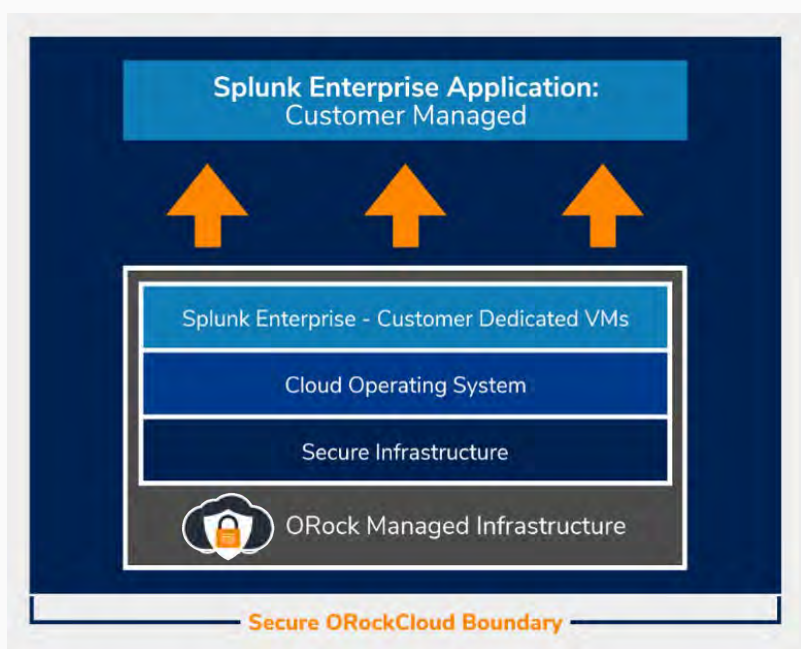

Joshua Cornutt - CTO, ORock Technologies

FR FedRAMP

12X
SSD 16K
RANDOM WRITE IOPS

ceph

ORock offers **FedRAMP Moderate Authorized** and **FedRAMP High Ready** cloud computing environments.

ORock's FedRAMP High cloud provides **up to 12x storage performance** over the competition, for low-latency log ingestion and indexing.

Splunk Enterprise is backed by ORock's **open-source, geo-distributed, high performance Ceph** storage platform.

Splunk Enterprise Application: Customer Managed

Splunk Enterprise - Customer Dedicated VMs

Cloud Operating System

Secure Infrastructure

ORock Managed Infrastructure

Secure ORockCloud Boundary

ORock delivers **Splunk 3 ways:**

Splunk Standard
Splunk Encryption at Rest
Splunk Compliance and
Encryption at Rest

Secure Set Up
Deploy fraction of the time
vs on-premise

Splunk Certified ORock Engineers

High Performance Hardware
for data storage with
no ingress or egress fees

Unify your **security posture** across your hybrid, and multi-cloud, environments and gain precision insights, in **real-time**, into your workloads with ORock's high-performance storage and networking.
