

# Cloud Assessment

## Take Control of Your Cloud Spend While Maximizing Performance

### CONTROLLING SKY-HIGH CLOUD COSTS

When running a hybrid or multi-cloud environment, visibility into these environments becomes a challenge when you're trying to understand how much you're spending. With ORock's cloud assessment, you will learn how ORock's equivalent cloud services can offer better performance. You will also receive a recommended course of action that, in many cases, will save you money once you switch your AWS or Azure cloud environments to ORock.

Typically, organizations have these challenges with their public cloud solutions:

- Costs aren't shown in real-time
- Resources are not factored into the total cost picture, including the cost of data transport, egress fees and support costs
- Complex and ever-changing price structures for cloud services

Our assessment can help you uncover savings in the following areas:

- Egress and data transport fees. ORock does not charge for data egress or transport fees.
- Better performance. Organizations usually pay extra for storage performance. These costs are a flat rate in ORock's invoice.
- API fees. We find that organizations unexpectedly pay more for API 'puts and gets' and all other API requests. ORock does not charge for API transactions.

ORock has partnered with an industry-leading cloud assessment company that leverages secure API access into your AWS or Azure invoice to track real-time usage metrics. ORock leverages the tool to compare against benchmarked service utilization and pricing, and provides guidance on where to optimize cloud services costs.

### NOW IS THE TIME TO SAVE ON YOUR CLOUD INVOICE

Let ORock help you to take control of your current and future cloud spend with a secure, quick and easy-to-understand cloud assessment.

Within 48-72 hours of sharing your invoice and completing the assessment, you'll receive a clear analysis of your AWS or Azure invoice and quickly see areas of savings and performance advantages with ORock.

### WITH OROCK'S CLOUD ASSESSMENT REPORT YOU GET:

#### Visibility

See where your AWS or Azure budgets are spent across cloud services and understand where the opportunities are to cut costs while maximizing performance

#### Recommendations

The assessment delivers highly-detailed recommendations on how to best optimize resources to save costs while supporting your business needs

#### Typical Savings Opportunities

Assessments can uncover charges often overlooked or under estimated. While not an exhaustive list, these can include data retrieval or access fees, data transport fees (Internet ingress or egress), API calls, storage performance IOPs fees, support costs and storage snapshots

#### ORock Advantages

Highly-secure open-source cloud, U.S.-based customer service, predictable pricing model
